Excused Absence for Educational Reasons

At least five (5) days in advance of the anticipated absence from school, the student should submit this request to the school Principal stating clearly the number of days of absence, a full description of the nature of the learning experience (where the student will visit and what it is hoped the student will learn), and under whose charge the student will be placed.

Guidelines:

1. Class assignments and tests, given while the student was on the educational trip, are to be completed after return to school within a time period equal to the number of school days the student was absent (e.g. 5 days absent, 5 days to make-up work). The exceptions to this provision are for long-term assignments with pre-established due dates and for an absence at the end of a grading period. In these instances, assignments are due at the direction of the teachers.
2. If a student is experiencing difficulty in regular school work, such absences might further contribute to the problem. In such a case, parents should seriously consider the possible academic consequences of the absence (especially if it is to be lengthy).
3. Teachers are requested to communicate to the Principal any concerns they may have about a student's requested absence.
4. In order to qualify, the educational trip must be conducted by the student's parents or another adult (i.e., 18 years or older) acceptable to the Principal and the student's parents.
